

**SECURE YOUR FINANCIAL FUTURE...** Manish Gupta & Associates Chartered Accountants has the knowledge and experience to help you with investing and growing your money for your future. Pictured, Chartered Accountant (CA) and Financial Planner, Manish Gupta. *Photo: Alicia Niglia.*

# Creating wealth

IF you've ever considered investing and growing your hard earned money for the future, then one of Shepparton's newest Accounting firms, Manish Gupta & Associates Chartered Accountants has the knowledge and experience to help you on your way.

As a Chartered Accountant (CA) and Financial Planner, Manish Gupta has worked and studied extensively both here in Australia as well as in his native India and is a qualified CA both in Australia and India with a Diploma in Financial Planning as well.

Manish says since moving to Australia 11 years ago, he has helped many families commence their journey towards creating sustainable wealth for the future.

"I feel blessed having come from a background where I learnt so much about business, wealth and finances. My profession has also helped me a lot to understand how money works and how it can work for you.

"Living and working here in Australia has shown me just how fortunate Australians are and with the right advice and direction, accumulated wealth is easily in reach of Australians at every stage of life. So often I meet people who say to me that they earn so much but they do not know where their money goes

and once I start tracking down how they spent their income, they realise lots of areas where they have been wasting their money instead of using it to build a secure financial future.

"Shares and properties are 2 main asset classes used to build wealth. The beauty of investing in the share market is that you can invest small as opposed to large capital requirement of property investment. One strategy you can adopt is to invest in shares in small parcels and once it's grown, it can be converted into property which is less risky.

"People often avoid commencing their investment portfolio because they feel like it either isn't the right time for them, they're not sure how or they don't believe that they have enough wealth to commence. There are many excuses, but a downturn in the economy presents the perfect time to invest and you can start small. With the right advice your wealth can begin from just a small seed and in time you will reap the fruits of your labour."

For the right advice and know how to start you on the road to creating wealth, contact Manish Gupta & Associates Chartered Accountants at 31 Wyndham Street, Shepparton, phone 5831 7364 or visit [www.guptaassociates.com.au](http://www.guptaassociates.com.au)
